Subject: Request for Tributyltin oxide (TBTO) older Science Reviews "pending post"

Hi,

According to the Chemical Search website, several of the older TBTO studies are "pending post – available under FOIA by writing to hq.foia@epa.gov"

I am interested in the following 3 studies listed at the bottom of this email.

[LEARN THE ISSUES](#) [SCIENCE & TECHNOLOGY](#) [LAWS & REGULATIONS](#) [ABOUT EPA](#)

Office of Pesticide Programs [Contact Us](#)

[Chemical Details](#) [Regulatory Actions](#) [Science](#) [Emergency Exemption](#) [Dockets](#)

[Try Another Search](#)

Tributyltin oxide (NO INERT USE)

EPA has produced a vast collection of science-related documents to support pesticide registration decisions. Below you will find a subset of documents that, generally, have been requested by the public through the Freedom of Information Act (FOIA) process. Each of these documents has been reviewed to ensure that any proprietary information is not included.

If you wish to obtain a document that is not currently posted, you may do so by filing a [FOIA request](#).

Cleared Reviews

ESA Litigation
